

Empowering Integrity Through Innovation

A secure, anonymous whistleblowing and ethics case management platform to comply, detect early, and resolve fast across your workforce and third parties.

Comply

One secure voice-up system across your portfolio companies, ready for governance and reporting.

Detect Early

Connect directly with employees and third parties for real-time truth, not filtered updates or post-crisis headlines.

Resolve Fast

Investigate, document, and close cases with structured collaboration, evidence management, and outcomes.

Deploy in days. Track impact in real time.

The Problem: Silence Hides Risk Until it Becomes Brand Damage

In large organizations, issues rarely start as headline events. They start as small signals from employees, contractors, suppliers, and customers. Without a trusted anonymous channel and a consistent process, those signals stay hidden until they escalate into legal exposure, reputational harm, and operational disruption.

5%

of revenue is estimated to be lost to fraud each year

Average loss per case: \$1.7M | Median loss: \$145K
Typical fraud lasts 12 months before detection

43%

of frauds are detected by tips - more than 3x the next method.

48%

of cases involve corruption, with a median loss of \$200K per case.

Why speak-up channels work

Tips are the top detection method, and they come from across your ecosystem.

Employee tips

Customer tips

Vendor / supplier tips

Common pain points we see

Low trust and under-reporting

People hesitate when anonymity feels uncertain or retaliation is feared.

Fragmented channels

Email inboxes, WhatsApp, spreadsheets, and ad-hoc committees create inconsistent handling.

No audit-ready trail

Hard to prove intake, escalation, investigation, and closure to regulators and auditors.

Slow resolution

Cases drag on without owners, SLAs, and structured workflows.

Third-party exposure

Suppliers, contractors, and customers often have no safe reporting pathway.

Brand and social-media risk

Issues surface publicly after damage is done, not early when they are fixable.

The Solution: One Platform for Speak-up, Investigation, and Governance

iVoiceUp provides the digital infrastructure to receive reports, manage cases, and generate governance insights while protecting anonymity and strengthening trust across your workforce and extended ecosystem. It's easy-to-use by blue collars and high adoption is guaranteed.

A simple end-to-end flow

- 1. Report** Anonymous voice, web, email, or chatbot intake
- 2. Triage** Category-based routing, escalation, and SLAs
- 3. Investigate** 2-way messaging, evidence management, team collaboration
- 4. Resolve** Actions, outcomes, and documentation in one system
- 5. Improve** Dashboards, heatmaps, trends, and audit-ready reports

INTAKE

- Anonymous reporting (voice, web, email)
- AI transcription and guided reporting chatbot
- Arabic and English plus 60+ languages

HANDLE

- Automated case routing and escalation
- 2-way messaging and case tracking
- Evidence management and audit trail
- Role-based collaboration

ANALYZE

- Historical analytics and trends
- Interactive heatmaps and KPIs
- Embedded PowerBI and reporting

SECURE BY DESIGN

- End-to-end encryption, SSL
- Multi-factor authentication
- Access control and throttling mechanisms

Built for enterprise adoption

Roll-out toolkit

Awareness materials and communication templates to drive usage and trust.

Third-party Access

Supplier, contractor, and customer reporting channels when needed.

Audit-ready outputs
