# Policy and Procedures

## Overview

Inadequate policies and procedures is one of the most frequently identified deficiencies in most organisation's cybersecurity risk management frameworks; internal audit or regulatory reviews.

We support organisations with developing Cybersecurity standards, policies and procedures tailored to the nature and size of their business; and in compliance with international standards such as ISO 27001 and PCI DSS.

## Benefits

- Well written, clear and concise policies and procedures support employees in performing their day to day tasks in a secure and compliant environment, reducing the risk of successful Cybersecurity attacks.
- Reduce audit and regulatory burden
- Enhance employee engagement and awareness

# Cyber Incident Response Planning

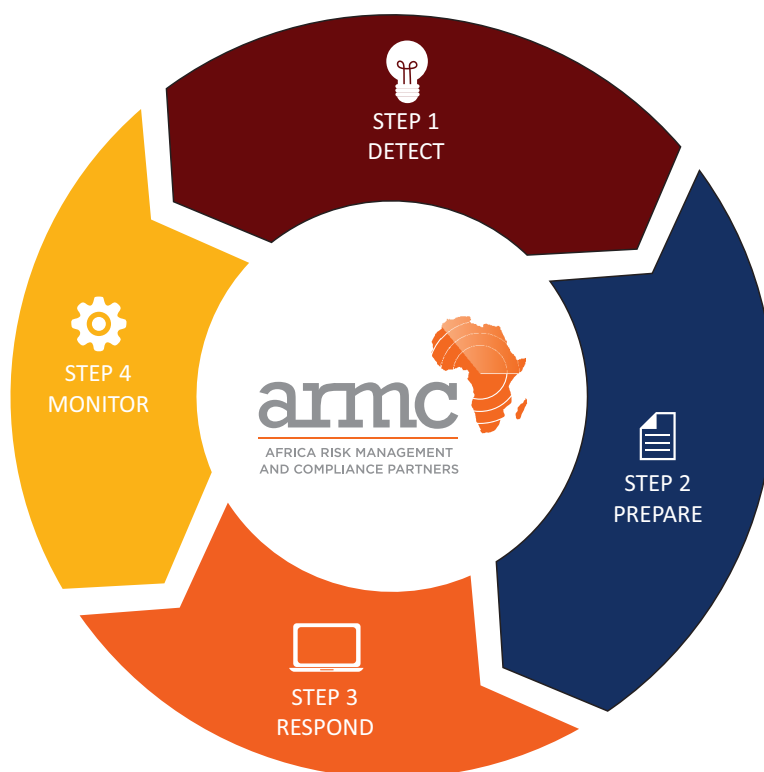

## Overview

Cybersecurity breaches are much more common than usually thought even for well-prepared organisations. Our experience has shown that how organisations respond to the incident in the first few hours directly influences long-term impact on the organisation. Our experts can develop robust, well-rehearsed incident response plans for your business.

## Benefits

A cyber incident response plan enables:

- Fast and proportionate response to limit the damage and reduce recovery time to minimise business impact
- Reduce legal liabilities, regulatory sanctions; and remediation expenses.
- Win customer trust

# Training and Skills Development

## Overview

To successfully maintain your cybersecurity defence posture you must ensure that your staff have the knowledge, skills and awareness needed to spot and avoid attempted cybersecurity attacks. Email remains the most popular method used by cybercriminals to successfully launch cyber-attacks. Industry research suggests that over 80% of successful attacks are due to employee carelessness.

We offer classroom and online training courses on Cybersecurity Awareness; ISO 27001: Introduction; Implementation and Auditing; and PCI DSS.

- Company-wide Staff Awareness Training on, Information Security, PCI DSS , Cybersecurity e.g. Phishing; Social Engineering.
- ISO 27001 Information Security Risk Management Awareness , Implementation and Auditing.
- PCI DSS Compliance Frameworks, Awareness, Implementation and Auditing,
- GDPR Compliance and Awareness.

## Benefits

- Cybersecurity Staff Awareness training can significantly reduce the number of successful cyber-attacks.
- Well trained staff will protect your intellectual property and customer data.
- Staff training will ensure you meet regulatory compliance requirements and international standards including GDPR, POPIA and ISO 27001; and will help you win new business.

# Penetration Testing

---

## Overview

The evolving cyber threat landscape and emergence of new technologies is making it ever harder to discover and remediate all of your organisations' vulnerabilities and defend against cyber-attacks.

Penetration Testing identifies the vulnerabilities in your IT Infrastructure and Applications and gives you the information you need to close any gaps in your security.

We safely review your network through the 'eyes' of a Cybercriminal and provide Penetration Test reports that document the information security vulnerabilities

Regular Penetration Testing is highly recommended for organisations with legacy business critical systems.

## Benefits

- Identify your security vulnerabilities and take remedial action to avoid costly data breaches and financial losses and regulatory sanctions.
- Builds trust by demonstrating a proactive Cybersecurity risk management stance to Regulators, Clients, Partners and Suppliers.
- Prioritise your Cybersecurity spending.

**Detect – Prevent – Protect**

# Technology Solutions

## Overview

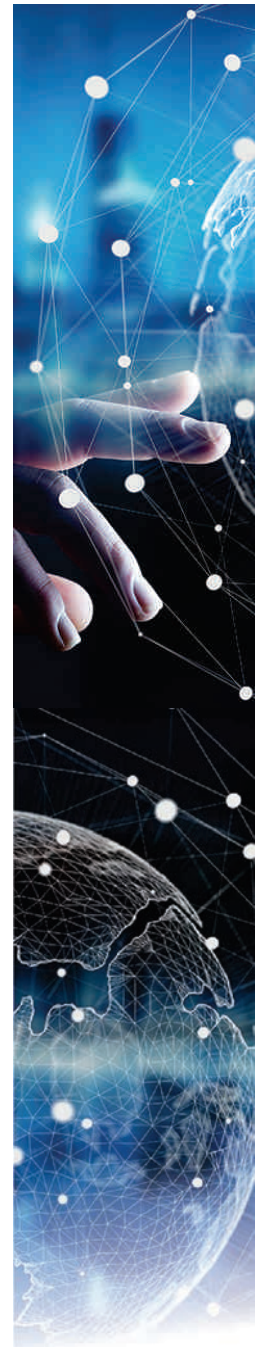

Organisations need robust technology solutions to manage their information security risks including network security & email encryption tools for secure communication, identity and access solutions for employee authentication and data leakage tools to prevent loss of confidential and customer data.

However, many organisations lack necessary skills and resources to adequately assess the suitability of technology solutions available in the market and struggle with the implementation and configuration of the tools to derive maximum advantage.

Our partnerships and relationships with technology companies ensures that we can offer you our expertise in choosing the technology solutions that meets your company's needs.

## Benefits

- Independent and expert advice to support your vendor and tool selection.
- Cost savings through our channel partners.
- Project management and implementation support.
