

PHISHING STAFF AWARENESS E-LEARNING COURSE

Take action against the increasing threat of targeted phishing attacks by educating your employees to be alert, vigilant and secure. This e-learning course helps employees identify and understand phishing scams, explains what would happen should they fall victim, and shows them how they can mitigate the threat of an attack.

DURATION

Approximately 30 minutes
20 randomly elected multiple-choice questions

FORMATS

E-learning

CERTIFICATION

Phishing Staff Awareness certificate issued to all staff who pass the test

COURSE HIGHLIGHTS

Phishing and ransomware attacks are becoming more popular and sophisticated, and their number is rapidly increasing. One of the reasons behind this incredible growth is the lack of basic knowledge about these threats: more than three quarters (76%) of UK office workers don't know what ransomware is and 36% can't confidently define a phishing attack, according to an ISACA survey.

No matter how many technological defences are in place to prevent phishing emails from landing in users' inboxes, no filtering method is 100% successful, so it's often up to the user to decide whether or not to open a phishing email or click a malicious link. Phishing awareness training can make the difference.

WHAT WILL YOU LEARN?

This course will help you and your team understand how phishing attacks work, the tactics that cyber criminals employ, and how to spot and avoid a phishing campaign.

What phishing is / Types of email and phishing attacks / What social engineering is / The consequences of a phishing attack / How easy it is to fall victim to a phishing attack / What happens when you click on a malicious link / How cyber criminals plan and execute a phishing attack / How to identify a phishing scam / Ground rules for avoiding phishing scams / Phishing and social media

BENEFITS

E-learning is a quick, affordable and effective means of delivering training to multiple learners:

- Provides systematic, consistent and repeatable training across multiple learners.
- No travelling or other course attendance costs.
- Web-delivered, so that you have no additional technology or integration costs or challenges.
- Can be deployed for existing employees and as part of an induction process for new hires.

TARGET AUDIENCE

This course is aimed at all employees who use the Internet or email as a means of conducting business. The course content is not technical.

ADDITIONAL FEATURES

- Customisable course content.
- Hosting options - the course can be hosted and delivered from IT Governance's learning management system (LMS) or your own.
- Multi-year licenses are available.
- For 150 or more users a custom quote can be requested.

ENSURE YOUR ORGANISATION UNDERSTANDS PHISHING
