COURSE HIGHLIGHTS

This fully accredited, practitioner-led course equips you with the skills to lead an ISO 27001-compliant information security management system (ISMS) implementation project. Learn from the developers of the original ISO 27001 Implementer course and get to grips with the nine steps to implementing and managing an ISMS.

Real-world practitioners show you how to tackle an ISMS project from start to finish. And implement and maintain ISMS for your company with complete confidence. This includes group discussions, practical exercises and case studies throughout the course.
